become that someone

HONORS PROGRAM

Pursue Your Educational Potential

Gavin - "Other honors students won't always be in your major, so having access to different ideas and perspectives has been great. Reach out and take the chance to expand your creativity and thinking."

Isabella - "Just try honors. You don't have to complete it if you are feeling overwhelmed, but by giving it a chance you'll realize, not only is it doable, but you're going to enjoy it and get a lot out of it."

Matthew- "My time in the Honors Program allowed me to fully explore my love for sports analytics. Completing my honors thesis on the men's basketball transfer portal was a project that I was passionate about, connected to, and allowed me to grow academically. This project ... expanded my network and allowed me the opportunity to present in a professional setting."

Program Highlights

- Honors Designated Courses
