

ADCS Assessment Plan

Description of the ADCS Associate of Applied Sciences

The Associate of Applied Science Degrees through ADCS provide a strong fundamental liberal studies curriculum with a few major courses included. Each degree transfers in 27 credits of specialty education from a diploma or certificate obtained through a Vo-Tech or other training center. The courses include English, management, philosophy, math, speech, a social science, history and fine arts. The degrees develop the necessary skills and competencies of a liberal arts education at Saint Francis University.

ADCS Associate of Applied Science Intended Student Learning Outcomes (ISLO)

1. Students will be able to demonstrate quantitative reasoning.
2. Students will be able to demonstrate critical thinking.
3. Students will be able to demonstrate the use of data and other tools used for problem solving.
4. Students will be able to demonstrate the ability to communicate effectively and professionally.
5. Students will be able to demonstrate writing effectiveness.
